

## ***AIRFORCE PUMPS Website***

Perfect for Residential "Dry" pipe systems too!

Controls water release to piping network *without electricity.*

In addition, it will supply the pumping power to deliver the water to the head(s).

Pneumatic control system operates on simple differential pressure principle.

Same pump and controls work with either wet, or dry pipe systems.

Easy to set up. Just one pressure setting on the regulator and you are good to go.

Operates on compressed nitrogen, or air, from standard cylinders.
